PROFILE

Full-stack web developer and graduate of Purwadhika Digital Technology School. Career switcher from sales, bringing strong communication skills, a client-first mindset, and a results-oriented work ethic into every project. I integrate AI tools such as Claude and GitHub Copilot into my development workflow as force multipliers — helping me write cleaner code, debug faster, and deliver practical solutions.

PROJECTS

Master Even — Event Management App

github.com/rizkiHid31/Event-Management-mini-project

Stack: React 19, TypeScript, Node.js, Express, PostgreSQL, Prisma, Redis, BullMQ

- Built a full-stack event platform with Customer and Organizer roles and role-based route guards.
- Implemented complete payment flow: upload proof → organizer confirmation → done/rejected.
- Features include vouchers (percentage/fixed), wallet/points system, and post-event reviews.
- Backend handles JWT auth, Cloudinary uploads, email notifications via Resend, and async jobs with BullMQ.

Toko Alat Pancing — Fishing Gear E-Commerce

github.com/rizkiHid31/Toko-alat-pancing

Stack: React, TypeScript, Express, PostgreSQL, Midtrans, Cloudinary

- Three-tier monorepo: customer storefront, admin dashboard, and REST API backend.
- Integrated Midtrans payment gateway and Cloudinary for image management.
- Customers can browse, add to cart, checkout as guest or registered user, and track orders.
- Admin panel covers product management, order processing, and dashboard analytics.

GYM Management System

github.com/rizkiHid31/GYM-Management

Stack: Next.js, TypeScript, SQLite (better-sqlite3), Tailwind CSS, shadcn/ui

- Monolithic full-stack app using Next.js App Router for both frontend and API routes.
- Handles member registration, QR-code-based check-in, walk-in visitor tracking, and POS.
- Finance dashboard with export support and role-protected staff interface.
